CIA Link Repeated

CPYRIGHT

VANCOUVER (CP) - A link between Lee Harvey Oswald, Clay Shaw, David Ferrie and the U.S. Central Intelligence Agency is claimed by an American law in Vancouver. Donald P. Norton, 25, said in an interview Saturday he encountered all three while he was on the payroll of the CIA.

Norton first came to see The Sun July 8, says the newspaper. "Since then many details of Norton's story have been confirmed. But the authenticity of his central claims defy verification by normal newspaper investigation."

Lee Harvey Oswald was named by the Warren Commission as the lone assassin of President Kennedy in November 1963. Clay Shaw, a New Orleans businessman, has been indicted by a grand jury on charges of conspiring to kill the president following an investigation by district attorney Jim Garrison of New Orleans.

David Ferrie who died in February of this year, was a central figure in Garrison's investigation. Mr. Garrison claims the assassination resulted from a complex conspiracy involving para-military groups linked with the CIA and dissident Cuban exiles.

Norton, a musician and a native of Columbus, Ga., told The Sun that Ferrie, a pilot, was his contact man in 1958 on a CIA assignment to carry about \$150,000 into Havana, Cuba.

Norton said he met Shaw in Alabama in August, 1962, before a CIA assignment to Monterrey, Mexico.

OSWALD

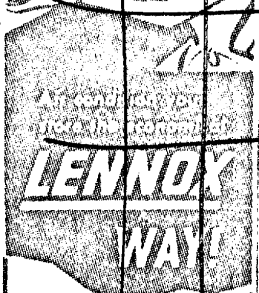

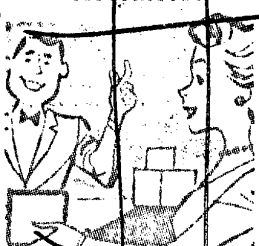

He said Shaw was with a man who gave him an attache case containing about \$50,000 to be delivered to a "Harvey Lee" in Monterrey in exchange for another case containing documents.

"During the publicity of the assassination when the man known as Lee Oswald was revealed to the public, I almost immediately recognized him as being the same Harvey Lee I had met in September, 1962, in Monterrey, to whom I delivered the money."

"I believe this was for a Monterrey to Calgary, Alta. Norton said he spent seven months criss-crossing the U.S. against Castro. This was a CIA assignment." He was then contacted and finally arrived and turned over the documents in Vancouver July 4.
